

CLIENTS IN CONSTRUCTION CASE STUDY

Over the last few years, we've empowered various Residential and Commercial building clients in using VR tech to showcase their products to customers in a more user friendly and cost effective way.

We have conceptualised and executed on a variety of different VR products, allowing our clients to:

- Build and show interactive Display Homes, long before they are actually in existence.
- Present proposed buildings to potential clients in full immersive and interactive 3D.
- Create brilliant visual products for marketing and promotion.

In each instance, we have been able to deliver virtual structures completely to spec, fully interactive if required, and at a fraction of the cost of an actual building.

This enables our clients to get maximum exposure, deliver first class customer service and get incredible return on their financial investment.

Some of these projects have enabled us to work alongside, or develop concepts for companies like:

- Plunkett Homes
- CARAT Australia
- ANMF Victoria
- Perthgrow Development
- Enslin Construction
- Various owner builders
